

SLURREX G

Emulsion in bulk, especially designed to reduce nitrous gases and to be used in boreholes with water, reducing operation costs by allowing to control density of the explosive, which provides high energy power and makes it applicable to very large boreholes.

Recommendations for use:

- This gassifiable emulsion is sensitized at the time of pumping to the borehole, for which special salts that determine the final density of the product are added. Therefore, density samplings must be conducted while loading the boreholes.
- Wait 15 - 20 minutes for desired infilling.
- The final explosive column should not remain for more than 3 days in the confined borehole.
- For initiating, using a primer of the appropriate size and weight according to borehole diameter and depth is recommended.
- Especially recommended for ground mining and large quarries.

Technical Characteristics

Technical Specifications	Units	Slurrex G
Density	g/cm ³	1.36 ± 3%
Detonation velocity	m/s	Not applicable
RBS**	%	120
Water resistance	hour	72

** Calculated with TERMODET simulation program.

Presentation and Packaging

Matrix emulsion distributed in tank trucks or tankers especially fitted for ground transportation of 24 - 30 tons. Stored in 30 - 90 ton silos.

Ask Exsa for other presentation formats.

Storage and Warranty

Kept in its original packaging and stored under normal temperature and moisture conditions, in accordance with applicable laws and provisions, the product is warranted for 3 months from the manufacturing date.

Transportation

CLASS 5.1 UN 3375

DISCLAIMER OF LIABILITY

These explosives have been inspected and found to be in good condition prior to packaging and/or delivery thereof. These explosives must be stored in a cool, dry and well-ventilated place, and be handled and transported in accordance with applicable laws. Accordingly, as from being delivered to the purchasers, the manufacturer shall not be liable for the safety of these explosives or for obtaining any results sought, whether express or implied. As from the delivery of these explosives, the purchasers thereof shall be liable for any and all risks and liability, regardless of their nature, for any accidents, losses, property or personal damages (including death), whether direct, indirect, special and/or consequential or of any other nature arising from the use of these explosives.
