

SILENT LINE

A silent non-electrical initiation system consisting of an instant detonator joined by a shock tube for signal transmission.

It is designed for use in underground mining, open pit mining and construction work, allowing remote initiation and providing higher safety in its use.

This initiation system has the advantage of not being subject to air conditions or electromagnetic waves.

Allows a simple and fast connection by the use of connectors, thanks to its composition, which includes a 54mm-aluminum capsule, a low-power charge with capacity for 4 shock tubes of the EXEL line and detonating cords.

Presentation and Packaging

TUBE COMPR. (m)	UNITS/BOX	NET WEIGHT (kg)	GROSS WEIGHT (kg)
500	1	2.94	4.52
750	1	4.25	5.25

Presentation and Packaging

In 500- or 750-meter rolls and packaged in cardboard boxes.

Ask Exsa for other formats.

Storage and Warranty

Kept in its original packaging and stored under normal temperature and moisture conditions, in accordance with applicable laws and provisions, the product is warranted for 24 months from the manufacturing date.

Transportation

CLASS: 1.1 B UN 0360

DISCLAIMER OF LIABILITY

These explosives have been inspected and found to be in good condition prior to packaging and/or delivery thereof. These explosives must be stored in a cool, dry and well-ventilated place, and be handled and transported in accordance with applicable laws.

Accordingly, as from being delivered to the purchasers, the manufacturer shall not be liable for the safety of these explosives or for obtaining any results sought, whether express or implied. As from the delivery of these explosives, the purchasers thereof shall be liable for any and all risks and liability, regardless of their nature, for any accidents, losses, property or personal damages (including death), whether direct, indirect, special and/or consequential or of any other nature arising from the use of these explosives.
